Project Title: Police Safety Response Equipment

Project Abstract:

The Hollywood Police Department (HPD) is comprised of approximately 350 sworn officers. Currently, HPD officers are not equipped with automated external defibrillators (AEDs). AEDs can save lives by delivering electric shocks to the heart. The portability of an AED allows officers to have quick access to life-saving technology by storing it in patrol vehicles. This grant will benefit the community by allowing us to purchase equipment to further aid in our life safety efforts for the public.

Project Identifiers:

- Equipment – General
- Policing
- Standards

Goals:

HPD's project goal is to implement an AED initiative to outfit officers with equipment. This initiative will improve the level of care available to people in the Hollywood area. HPD's overall goal is to enhance life safety efforts that increase public safety response.

Objectives:

- Improve the level of care available to people in the Hollywood area.
- Increase inventory of safety response equipment

Deliverables:

- Procure AED equipment.
- Provide staff training for equipment
- Install in Patrol Vehicles

Proposal Narrative:

Description of the Issue:

The City of Hollywood, Florida, spans approximately 30 square miles of Broward County and boasts a resident population of over 150,000. The HPD is tasked as the primary law enforcement agency within the City of Hollywood. The Police Department is responsible for responding to all 911 calls and general calls for service, investigating crimes, proactively patrolling the city, and handling all crises. HPD has been unsuccessful in funding AED equipment. To facilitate public health and safety, HPD officers utilize life-saving procedures to stabilize a victim until EMS can arrive. Officers are trained to perform cardiopulmonary resuscitation (“CPR”) on a person who is suffering from cardiac arrest. However, CPR is useful when administered to maintain blood flow after cardiac arrest whereas AEDs can restore the heartbeat. Combining both emergency procedures can significantly increase the chances of a person surviving cardiac arrest. With the officer’s current CPR training, AEDs will provide a robust emergency response by providing life-saving treatment to victims of cardiac arrest.

Project Design and Implementation:

The implementation of this initiative will deploy 12 portable AED devices to officers on Patrol. AEDs are stored in a carrying case and will be in an assigned patrol vehicle. The AEDs will also be available at special events and high-stress law enforcement training classes. The biennial CPR training will be completed in service in the first quarter of 2025. This training includes training on the operation of the AED equipment. The inclusion of these AEDs will supplement life-saving tools and resources. Public safety is the primary goal of HPD, and this additional equipment contributes to ensuring the public's safety.

Capabilities and Competencies:

The City of Hollywood is the 2nd largest Municipal Police Department in Broward County. The Police Department is committed to delivering professional law enforcement services to its resident and visitor population. The Hollywood Police Department handles over 190,000 calls for service annually, including providing mutual aid to neighboring municipalities and the Broward County Sheriff's Office.

The City of Hollywood has received JAG Funding and numerous other Federal, State, and Local Grants without any major issues. It is very familiar with the programmatic requirements of this grant.

Plan for Collecting Data:

The Hollywood Police Department Fiscal team will be responsible for maintaining records and documentation of the equipment purchases and ensuring the reports are submitted on time. The Team is comprised of the Fiscal Manager, Financial Analyst, Accounting Specialist, Fiscal administrative staff, and the Police Grants and Special Projects Officer.

Disclosure of Pending Applications: Hollywood does not have any pending applications that request funding for the same projects proposed under this solicitation.

Disclosure of High-Risk Status: Hollywood is not identified as “High-Risk Status” in accordance with grant guidelines.

Disclosure of Lobbying: The Hollywood Police Department is not involved in lobbying.

Local Governing Body Review: The Hollywood Police Department will forward proof that this application will be reviewed by its City Commission. Due to the timing of this application, the item will be placed on the agenda for an upcoming meeting after the submission of this application.
